

10.3.3 Proficiency Medals

These medals are awarded for the best academic performance in each discipline of the BS-MS (Dual Degree) programme. Currently, there will be five proficiency medals one each for Biological Sciences, Chemistry, Earth and Environmental Sciences, Mathematics, and Physics (Proficiency medal for new disciplines/UG programmes will be instituted as and when the first batch of students from that batch graduates). For each discipline, students with a CPI ≥ 8 and no 'F' grade in any course during the entire programme can be shortlisted for this medal. Amongst the shortlisted students, the student with the highest CPI in a given discipline on completion of the programme will be awarded a proficiency medal in that discipline. In the event of a tie, the student with the maximum number of 'O' grades will be awarded the medal. If there is a tie in 'O' grades, the student with the maximum number of 'A' grades will be awarded the medal, and so on.
